## SUMMARY

---

- Over 8.5 years of design experience, implementing and developing software for financial, commercial and other businesses, industrial applications in manufacturing and business environment.
- Profound knowledge of object-oriented methodologies, database application design, web site development, maintenance and accountancy
- Improved coverage development flow in terms of early detection & root cause analysis of bugs using CI best practices.
- Experience working with distributed systems in a production setting.
- Experience translating complex requirements into scalable, extensible implementations with an eye toward maximizing reuse.
- Standard software engineering methodology, unit testing, code reviews, design documentation using agile / scrum methodologies

## EDUCATION

---

### **B.Tech. in Computer Science**

Aug. 2009 - Jul. 2013

The LNM Institute of Information Technology CGPA : 6.58/10

## SKILLS

---

Java, Python, Javascript, react, Jenkins, Docker, Kubernetes, Openshift, Maven, Agile, SpringBoot, Ansible, RHEL, Oracle, MySQL, NoSQL, Apache Sling, Apache Kafka, Elasticsearch, Kibana, Beats, Logstash, Spark, Azure, AWS and Google Cloud Platform, Redis, Memcached, Tableau, Jira

## EXPERIENCE

---

### **Senior Software Engineer — Red Hat Customer Platform**

Pune, India  
*Jun. 2019 - Present*

- Individual contributor in building document build and publish platform.
- Lead developer for on demand content localization using AI/ML via cloud services.
- Feature enhancements and bug fixes for the Applications.
- Improving coverage development flow in terms of early detection & root cause analysis of bugs using CI best practices.
- Ensure high reliability, monitoring, logging and continuous delivery of artifacts.

### **Software Engineer: Advanced — Amdocs Order Management System - Core**

Pune, India  
*Jun. 2017 - April. 2019*

- Design and development of core product and expose services as per client requirements, keeping core product security.
- Fix defect, write documentation and add enhancements following Agile practices.
- Migration from Monolithic to Micro services Architecture, with support of cross projects integration.

### **Application Software Developer — Accenture Media Services**

Pune, India  
*May. 2016 - May. 2017*

- Middleware services & interfaces migration from the legacy technology stack (SUN JCAPs) to Oracle Fusion platform and configure OSB for Application Gateway and authentication
- Provided L3 support to resolved the issues within the defined SLA and also done the code review for a peer group and new members of the team.

### **Insurance & Banking**

*Jan. 2014 - May. 2016*

- Design and development of core product and expose services as per client requirements, keeping core product security.
- Fix defect, write documentation and add enhancements following Agile practices.
- Migration from Monolithic to Micro services Architecture, with support of cross projects integration.

## UNDERGRADUATE PROJECTS

---

### **Gemini Solution (Internship)**

Gurgaon, India  
*Oct. 2013 - Dec. 2013*

- Real time Analysis of the executing batch and reporting & Bug fixes and Change requests developments.

**MNIT**  
**(Internship)**

Jaipur, India  
*May. 2011 - Aug. 2011*

- IT- Lab setup, cyber-attack modeling & Vulnerability assessment using open source tools

**LNMIIT**  
**(Internship)**

Jaipur, India  
*May. 2012 - Aug. 2012*

- Image Processing : Color quantization, dithering, image segmentation and edge enhancement (by edge linking, differential thickening and smoothing) to give a painterly look to photo-realistic images

## **AWARDS**

---

- Won Hackathon competition: A global challenge internal to Accenture for using technology to provide solution.
- Received Team Recognition in delivering the product within timeline
